INTRODUCTION

Background

The West Virginia Board of Regents was established in 1969 as the governing board for the state system of higher education. It was charged with the general determination, control, supervision, and management of all West Virginia public colleges and universities. Essential to the successful management of any complex and diversified system is the availability of objective statistical data to aid in the formation of prudent management decisions. Since its creation the Board has worked to establish a comprehensive management information system designed to generate data concerning many aspects of West Virginia higher education. This report is an analysis of the degrees conferred during the 1980-81 academic year by institutions of higher education.

The Board is committed to the formulation of carefully designed new degree programs that are directly related to West Virginia manpower needs and employment opportunities. Likewise, the Board desires to avoid the unnecessary duplication of programs throughout the state, as well as the elimination of programs at the public institutions that attract few students or that involve excessive costs. The tables presented in this publication relating to degree programs represent only one type of analyses produced by the Board's educational research section. The data have been reported without reference to any critical or judgmental standards.

Nationally accepted definitions and principles have been used in the collection and classification of data for this report. The West Virginia Board of Regents Form BOR DA-1, Degrees Awarded, 1980-81, was used for the collection of the data. The 29 academic areas of study utilized in this report (30 including the West Virginia Board of Regents' B.A. Degree) have been extracted from the U.S. Office of Education publication, "A Taxonomy of Instructional Programs in Higher Education." This taxonomy represents an effort to organize and record data concerning institutional programs in a consistent and meaningful manner. The data of this report are generally comparable to reports prepared by other states. Included in this report are all West Virginia public and private institutions of higher education.

HIGHLIGHTS — ALL INSTITUTIONS

During the 1980-81 academic year, 12,586 degrees were conferred by institutions of higher education in West Virginia. An absolute increase of 401 total degrees conferred resulted in a 3.29 per cent increase over the 12,185 total degrees conferred in 1979-80 (See Figure A).

Figure A presents the total degrees conferred for each of the past five academic years. Of the total degrees granted by all West Virginia institutions, public institutions awarded 85.3 per cent in 1976-77, 85.4 per cent in 1977-78, 85.0 per cent in 1978-79, 85.4 per cent in 1979-80 and 85.1 per cent in 1980-81.

The total degrees awarded at each degree level by all West Virginia colleges and universities for each of the past five academic years is presented in Figure B. When analyzing the changes in productiveness by level of degree for the 1980-81 academic year over 1979-80, the following increases are revealed: Associate Degrees, 3.6 per cent (2,160 to 2,237); Bachelor's Degrees, 6.3 per cent (7,381 to 7,847). A decrease was revealed in First Professional Degrees of 3.7 per cent (351 to 338); Master's Degrees , 4.2 per cent (2,148 to 2,057); and Doctor's Degrees, 26.21 per cent (145 to 107). Figure B also shows the proportion of degrees conferred by the public and private institutions for each degree level.

Soon after its formation, the Board of Regents determined that the most critical higher educational need in West Virginia was an expanded program of career-technical and pre-baccalaureate (college transfer) offerings of two years or less duration. The Board has approved the establishment of new programs designed specifically to meet these needs. Although most of these degree programs have only been in operation for a short period of time, Figure G shows that the associate degree level has recorded a steady increase over the past five years. Of the total 1,832 associate degrees conferred by the public institutions, 1,602 or 87.4 per cent were career-technical associate degrees and 230 or 12.6 per cent were pre-baccalaureate associate degrees. Figure J presents a breakdown by academic area of both the career-technical and pre-baccalaureate associate degrees.

Education and business and management accounted for over 42 per cent of the total bachelor's degrees awarded by the public colleges and universities. For a breakdown of the first professional, master's and doctor's degree levels for each academic area, see Figure E on Page 6. Please note that West Virginia Wesleyan awarded 10 master's degrees, Wheeling College awarded 6 and Salem College awarded 14 in 1980-81.

EXPLANATION OF TABLES

The report is divided into three basic sections: All Institutions, Public Institutions, and Private Institutions. The first section presents a statewide analysis while Sections II and III present analyses of the public and private institutions respectively.

Section I is composed of three tables. Table 1 summarizes all degrees conferred by institutions of higher education in West Virginia by level of degree, control of institution, and by sex of the student. Table 2 presents an analysis of all the degrees conferred by level of degree, sex of student, and control and level of the institution. Total degrees conferred are summarized in Table 3 by level of degree, control of institution and by academic area of study.

Sections II and III are composed of similar tables. Tables 4 (Section II) and 7 (Section III) respectively present a summary of the total degrees conferred by each public and private West Virginia institution of higher education. The data are reported by level of degree and sex of student.

Tables 5 (Section II) and 8 (Section III) are analyses of the number of different degree programs offered and the total degrees conferred by each West Virginia public and private institution by academic area of study and level of degree. The total degrees conferred in each degree program offered by each West Virginia public and private institution by academic area of study, sex of student, and by level of degree are reported in Tables 6 (Section II) and 9 (Section III) respectively.

In Tables 5,6,8, and 9 the Associate degree level is not subdivided into career-technical and pre-baccalaureate degree level classification. Most associate degrees are reported under the last six academic areas of study, all ending in the word technologies. The baccalaureate and higher degree programs are reported under the first 23 academic areas of study ranging from Agriculture and Natural Resources to Interdisciplinary Studies. Regents B.A. degrees are also reported for each institution.

When zero or few degrees are reported for an individual degree program the reader should not prematurely conclude that the program is an unproductive one. Some are new programs that have not been operative for a sufficient length of time for any degrees to have been produced, while some programs are presently being phased out, and therefore, are naturally producing few degrees. The Appendix presents the definitions of degree levels used in this report.
